Transition to the 3rd Platform

OSDU Data Platform - The Foundation

Founded by operators | > 194 members | Core is DELFI Data Ecosystem | Well Construction and Production data coming 2022

Industry need - A modern upstream data platform

The modern data platform will ...

enable data
discovery

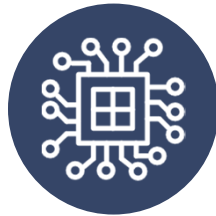

with access any
time, anywhere

to trusted data
- in context

performing
analysis in place

with seamless
integration

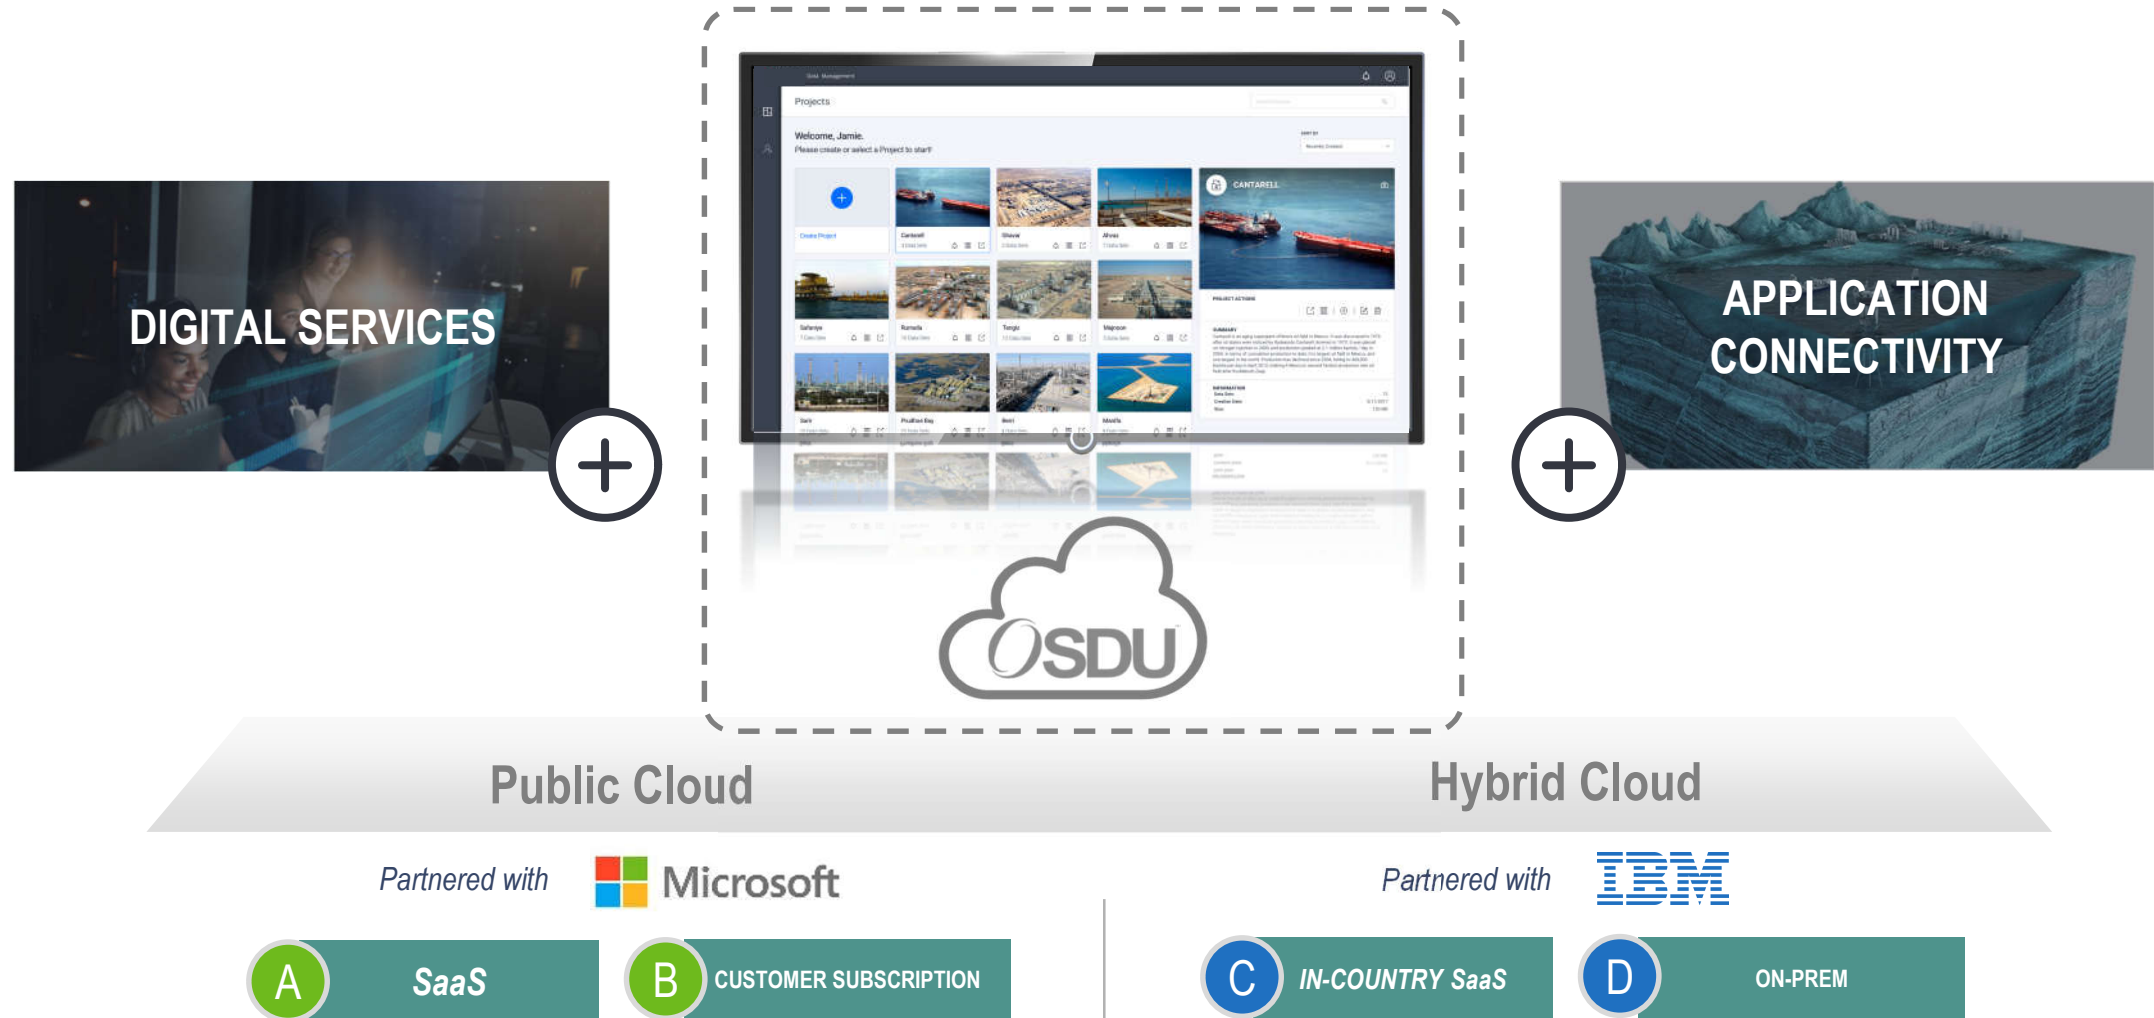

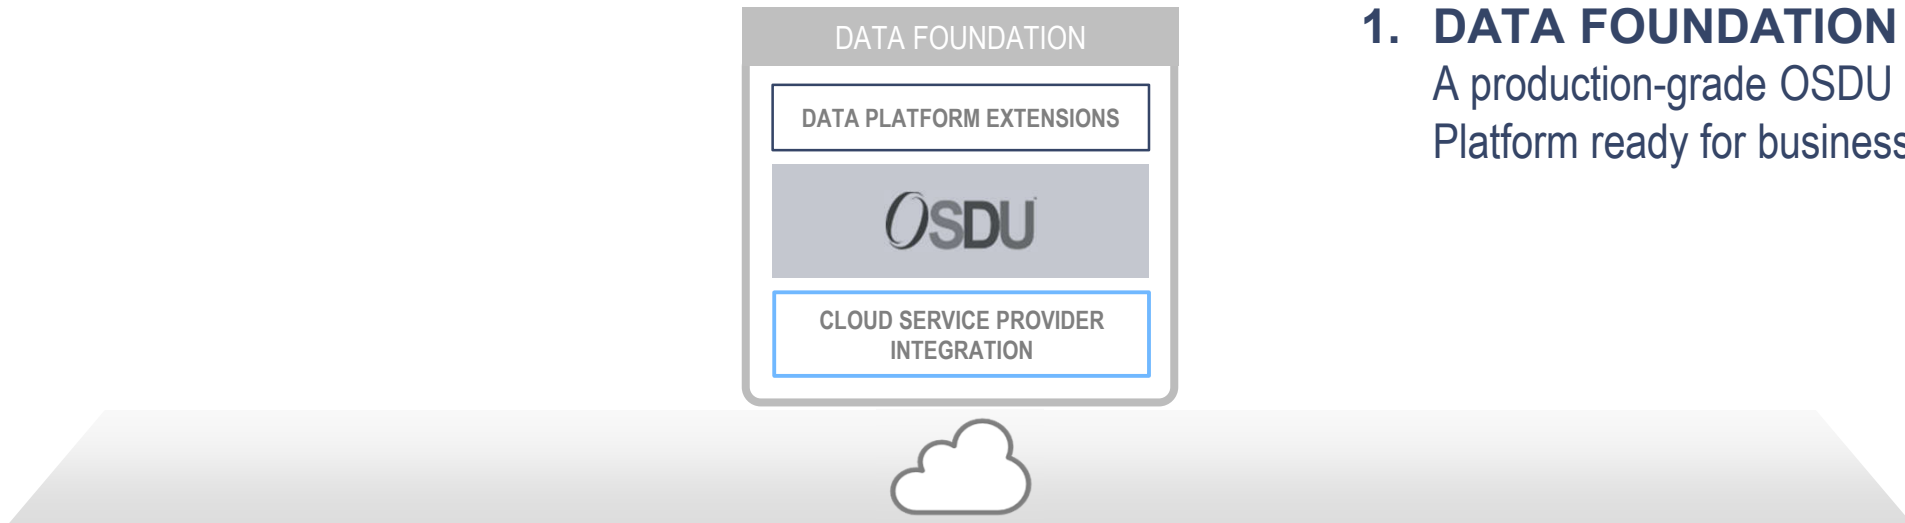

Automation and Intelligence in data management processes
will deliver a step change in decision making efficiency
